

Vision

Global Food Security, a major challenge

OCP continues to maintain and expand upon its presence in the national and international agricultural scene and has dual objectives of reinforcing its leadership and fulfilling its commitment to global food security.

A culture based on the exchange of ideas and a collective thought process

In addition to serving as a major contributor to global food security through our provision of appropriate, adapted, affordable fertilizers, OCP is committed to making a major contribution to the global debate, partnerships and joint actions to promote food security, with a particular focus on promoting innovation and investment to revitalize agriculture in Africa and elsewhere in the Global South.

To this end, OCP has created the Global Food Security Forum, an initiative that brings together a range of partners from South and North for concrete actions to promote sustainable and innovative approaches to food security.
