

OCP Foundation's agricultural caravan reaches Ethiopia.

OCP Foundation's agricultural caravan reaches Ethiopia.

Addis Ababa, 1st June 2018. The Agricultural Caravan, supported by OCP Foundation in several sub-Saharan African countries, is now reaching Ethiopia. It is targeting four agricultural regions of the country in its pilot phase including Oromia, Amhara, Tigray and SNNP. The objective is to complete a soil fertility map for a pilot zone in the country by October 2018. No less than 100,000 hectares will be mapped, collecting 1,000 soil samples to be analyzed. Data obtained from these surveys will serve to implement the soil fertility map expert system for crop fertilizer recommendations.
