

Researchers' Villas

Researchers' VILLAS, Mohammed VI Green City - Benguerir

-

The Researchers' Villas, built by the OCP Group in the Mohammed VI Green City in Benguerir, is a unique and innovative development project that combines local expertise in terms of material use and innovation to optimally manage natural resources. Designed to house researchers from the Mohammed VI Polytechnic University, the Researchers' Villas integrate bioclimatic design concepts and sustainable management of water and energy resources. This architectural prototype demonstrates OCP's commitment to the environment and to developing environmentally-friendly, energy-efficient construction methods.
